## **Plate Method for Diabetes**

Foods with carbohydrates make your blood glucose level go up. The plate method is a simple way to meal plan and control the amount of carbohydrate you eat.

Use the following guidance to build a healthy plate to control carbohydrates. Divide a 9-inch plate into 3 sections, and consider your beverage the 4th section of your meal:

Food Group	Examples of Foods/Beverages for This Section of your Meal	
Section 1: Non-starchy vegetables Fill ½ of your plate to include non- starchy vegetables	<ul> <li>Asparagus</li> <li>Broccoli</li> <li>Brussels sprouts</li> <li>Cabbage</li> <li>Carrots</li> <li>Cauliflower</li> <li>Celery</li> </ul>	<ul> <li>Cucumber</li> <li>Green beans</li> <li>Mushrooms</li> <li>Peppers</li> <li>Salad greens</li> <li>Tomatoes</li> <li>Zucchini</li> </ul>
Section 2: Protein foods Fill <sup>1</sup> / <sub>4</sub> of your plate to include a lean protein	<ul> <li>▶ Lean meat</li> <li>▶ Poultry</li> <li>▶ Fish</li> <li>▶ Seafood</li> <li>▶ Cheese</li> <li>▶ Eggs</li> </ul>	<ul> <li>Lean deli meat</li> <li>Tofu</li> <li>Beans</li> <li>Lentils</li> <li>Nuts or nut butters</li> </ul>
Section 3: Carbohydrate foods Fill 1/4 of your plate to include carbohydrate foods	<ul> <li>Whole grains</li> <li>Whole wheat bread</li> <li>Brown rice</li> <li>Whole grain pasta</li> <li>Polenta</li> <li>Corn tortillas</li> <li>Fruit</li> </ul>	<ul> <li>Starchy vegetables</li> <li>Potatoes</li> <li>Green peas</li> <li>Corn</li> <li>Beans</li> <li>Acorn squash</li> <li>Butternut squash</li> <li>One cup of milk also counts as a food that contains carbohydrate</li> </ul>

▶ Unsweetened tea

▶ Coffee
